

HC Charteris Strategic Bond Fund

Fund's Strategy

The Fund has been specifically designed for a period of rising interest rates and will be focused on capital preservation in a market where there is much asymmetric risk that lies within it.

Investment Process

The Fund Managers combine top-down thematic strategy with bottom-up stock selection. They employ technical analysis extensively to help time investment decisions.

This strategy is different to rival bond funds because few have the flexibility to have such a high weighting to Floating Rate Notes (Redeemable and Perpetual) to help battle rising interest rates.

Fund Manager's Comments

Recent re-positioning into the UKT 1.5% 2021 conventional continues to help combat significant volatility alongside the other short dated conventional Gilts in the portfolio. The high yielding utility equities have had a positive impact in this quarter.

The Fund was up +0.70% versus the IA Strategic Bond benchmark of -0.64% for the quarter meaning the fund sits top quartile. The differential performance was +1.34% on a total return basis.
