

HC Charteris Premium Income Fund

Fund's Strategy

The Fund seeks to outperform a portfolio of leading blue chip equities with a target dividend yield of 5-6% through a combination of active stock selection and writing covered call options.

Investment Process

The Fund Managers combine top-down thematic strategy with bottom-up stock selection. They employ technical analysis extensively to help time investment decisions including writing covered call options. This strategy is different to other call option Funds because the managers write call options for only part of the year and not continuously.
