

HC Charteris Global Macro Fund

Fund Strategy

The Fund seeks to maximise returns from a portfolio of Global Equities offering growth opportunities available throughout the world.

Investment Process

The Fund will predominately invest in a portfolio of Blue Chip Global Equities. The Fund will also use ETFs and Investment Trusts and have a minimal exposure to smaller companies. The Fund Manager also has the ability to switch all or part of the portfolio into G7 Government Bonds if, in the opinion of the Fund Manager, Global Equity Markets are vulnerable to a set back.

Fund Manager's Comments

The macro fund continues to hold its defensive position which means that currently it is in a sideways position. Having deliberately chosen not to chase the darlings of the tech stocks - when compared to our competitors we lag behind. We have now seen the likes of Facebook and Tesla weaken as they face headwinds relating to culture and regulation is encouraging. With so many events that threaten global markets, we continue to follow a defensive route.

The fund went down -7.41% versus the IA Global benchmark of +3.83% for the quarter. The differential performance was -11.24% on a total return basis.
