

HC Charteris Global Macro Fund

Fund Strategy

The Fund seeks to maximise returns from a portfolio of Global Equities offering growth opportunities available throughout the world.

Investment Process

The Fund will predominately invest in a portfolio of Blue Chip Global Equities. The Fund will also use ETFs and Investment Trusts and have a minimal exposure to smaller companies. The Fund Manager also has the ability to switch all or part of the portfolio into G7 Government Bonds if, in the opinion of the Fund Manager, Global Equity Markets are vulnerable to a set back.

Fund Manager's Comments

The fund has gone up +16.88% on a total return basis for calendar year 2019.

The fund has maintained its position with regard to investment approach as central banks once again adopt money printing as an option. Some regions of the world proposed and introduced negative interest rates which could spark inflation making Gold & Silver more attractive along with other hard assets. The fund continues to hold substantial positions in these hard assets and will continue to do so in the medium term. We were happy to see solid performance from the mining equities inside the portfolio.
