Q & A

How is this Fund different from other property funds?
The *HC Charteris Property Fund* provides a unique blend of blue chip commercial and residential property stocks as a core approach, supplemented by satellite of global holdings providing income and value without sacrificing liquidity. The Fund does not invest in physical property keeping our charges comparatively low and taking advantage of favourably turbulent markets. Unlike other property funds on the market, we aim to avoid using other manager's funds, focusing on careful research to target listed stocks, while some more difficult to access markets are accessed through low cost high liquidity index funds. Our relative smaller size means we are able to move in the market quickly.

Why invest in this sector?

The property market provides diversification from more conventional investments while providing steady income and growth. Population pressures are helping to create very positive market conditions for the residential property market, while commercial property is benefiting from the global economic recovery supported by strong fundamentals

How do you divide research responsibilities in the team?

Research and monitoring is divided evenly throughout the team. Daily monitoring and maintenance of the ever growing watch list, as well as the day to day maintenance of the fund is undertaken by Mr Langlotz, while Mr Farrow's global macro view and charting techniques are employed for market timing as well as finding relative value in a crowded market. Mr Taylor's vast experience with balance sheet analysis provides a solid understanding of fundamentals. The Charteris team also harnesses various research portals and other detailed research material.

What type of investors would this fund appeal to?

A broad range of investors would find this fund useful in their portfolio's – primarily those looking for growth and diversification. Investors can therefore be sure that the underlying stock selection is based purely on the fundamentals of each company and potential upside. In this respect, investors gain exposure to a sector with great liquidity and companies with strong earnings that can produce an enhanced return on their investment.

What are the risks?

Like all equity funds, the value of this investment and the income from it can go down as well as up. Past performance should not be a guide to future performance as market conditions, political risk and interest rate movements can affect investor returns.
